

The incredible tool to help you manage and track potential issues before they affect your computer.

# ProVent

*What is included with ProVent?*

## ✓ REMOTE MANAGEMENT TOOL

- Gathers important information about your computers (disk errors, memory issues, and general audit information).
- Create rules to install updates automatically, using patch management.
- Can be used to take over your PC remotely instead of paying for a third party service interface.

## ✓ BITDEFENDER ANTIVIRUS

- Easy to deploy and extremely effective.
- Ranked in the top 3\* for business antivirus solutions.

## ✓ WEB CONTENT FILTERING

- A customizable security tool, limiting sites employees can visit, thus reducing chance of malware and virus infection.

ALL THREE FOR JUST **\$10<sup>00</sup>**  
per PC  
per month

### ALSO AVAILABLE...

**Backups:** Powerful image or file based backup tool for individual PCs or servers. Allows you to backup locally and securely to the cloud.

**PCI/HIPAA Compliance Reports:** Determine where your security holes are if you are looking to pass PCI compliance or if you are required to abide by HIPAA regulations.

***The answer, literally, at your fingertips.***

*ProVent is the answer for small or mid-sized businesses with limited IT resources.*

*This is an affordable, essential solution for smaller companies wanting to be proactive with their IT equipment.*
